

Product Application

The AC bypass slab secure clip connects an exterior wall stud to the building structure. Depending on the material properties of the structure and the proposed design, the AC secure clip may be attached to the structure with either an approved fastener or a weld. AC secure clips are designed to resist horizontal and vertical loads.

Clips come packaged in durable buckets for convenient handling on the jobsite.

Features and Benefits

- Variety of lengths available
- Ribbed legs for additional strength
- Loads based on #10 screws
 - Screws are provided
- Pre-punched guide holes
- Transfers horizontal load into structure
- Maintains lateral rigidity
- Eliminates bridging within 12" of support connection

Quantity / Order Information

Part No.	Width	Qty / Bucket	Lbs / Bucket
AC250	2 1/2"	100	47
AC350	3 1/2"	50	29
AC550	5 1/2"	50	41
AC750	7 1/2"	50	52
AC950	9 1/2"	35	45

Material Composition

- Mill certified steel
- ASTM A653/A653M
- 68 mil
 - 57 ksi yield strength
 - 65 ksi tensile strength
 - G90 galvanized coating

Screw Pattern Configurations

AC250, AC350, and AC550

AC750

AC750 with 2" offset

AC950 with 2" offset

Table Notes

- Allowable loads have not been increased for wind, seismic activity, or other factors.
- The allowable loads are based on the steel properties of the members being connected, per AISI S100.
- The nominal strength of the screw must be at least 3.75 times the allowable loads.
- Penetration of screws through joined materials should not be less than three exposed threads. Install and tighten screws in accordance with the screw manufacturer's recommendations.
- Values include a 3.0 factor of safety.
- Allowable loads indicated on the table(s) are for force in single direction only. The designer shall use the combined forces check as required by AISI S100 if more than one force is applied to the connection.
- The designer shall check the bending in the short leg of clip.
